

Unit Plan: Enrollment Requests

Unit: Automotive Technology

Division or Area to Which You Report: Applied Technology

Author(s) of this Unit Plan: Jim Baum

Date: 3/12/08

Audience: Budget, Deans, CEMC, IPBC

Purpose: To recommend changes in FTEF allocations for subsequent academic year and guide Deans and CEMC in the allocation of FTEF to units.

Instructions: In the area below, please list your requested changes in course offerings (with reference to corresponding change in FTEF) and provide your rationale for these changes. Be sure to analyze enrollment trends and other relevant data (<http://help/EMC/>). Please seek your dean's assistance as needed.

An on-going project is to link up with a factory sponsored automotive technology program in order to increase student job linkage. The current program targeted is the GM ASEP program.

A manufacturer linked instructional program will require an increase in FTEF of approximately 1.5.

There is not a firm estimate of when a program would be implemented; it would not be before the 2010-2011 academic year.
