Unit Plan: Description of the Unit

Unit: Computer Science
Division or Area to Which You Report: Math & Sciences
Author(s) of this Unit Plan: Desmond Chun, Keith Mehl, Jonathan Traugott, Wanda Wong
Date: March 14, 2008

Provide basic instruction, training and education in computer literacy and computer programming for those students interested in acquiring data processing skills for employment or majoring in computer science at a four year institution. The program caters a broad range of students: whether requiring a single computer literacy class as an academic requirement, looking for a job skill or wanting to transfer to a four-year institution. Courses include computer literacy (Microsoft Windows and the Office suite), programming concepts, programming languages and methods, World-Wide-Web programming, and operating systems (UNIX).
