

Chabot English and Math Assessment Trends for New Students Fall 2000-Fall 2012 (Including NGR)

These tables and charts show the assessment recommendation outcomes for new students who assessed and registered for a class at Chabot in the Fall, whether or not they stayed until Census Day. Until 2006, about two-thirds of students tested into English 101A/102, i.e., one level below college. That grew to three-fourths by 2008, where it has remained. The percent testing into College English dipped to 12 percent in 2009, but it is now 19 percent. In Math, almost half of the students tested into basic math (three levels below college level) in 1998. That share declined 14 percent by 2008. In 2009, after Math cut scores were raised and a lower level of basic math was created, about one third tested into the lowest groups. The percent testing into College Math dipped to 12 percent in 2009, but is now 18 percent.
