# Chabot College Student Accreditation Survey: Fall 2007

## Highlights

### Family Income and Status

The Student Accreditation Survey collects student demographic data that is not otherwise available, such as family income, parents' education, childcare needs, and living situations. This information is used to plan services and grants that respond to our students' needs. In 2007, 36 percent of Chabot students have low incomes according to federal standards and another 20% have low incomes based on local standards. This means that more than half (56%) of Chabot students are low-income. In addition, almost 60 percent of the students live with their parents, and almost 40 percent are in the first generation of their family to attend college.

The Student Accreditation Survey was conducted in October 2007 in a representative sample of 69 classes. Surveys were completed by 1,379 students (63% full-time; 37% part-time).||

**Fall 2007**  
**Family income level of students**

**Fall 2007**  
**Highest education level of either parent**

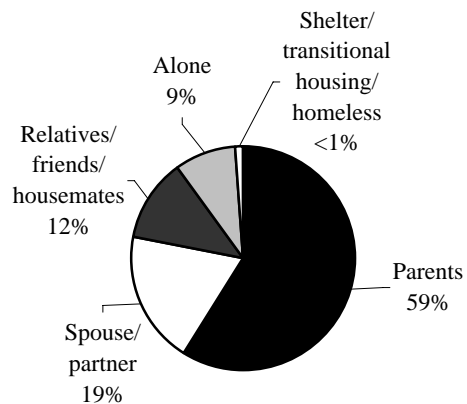

Notes: Family income was self-reported and adjusted by household size. Very low income is defined by the Federal government (i.e., US Department of Health and Human Services) as income earned up to 150% of national poverty level. Low income is defined as about 50% of local median income by the US Department of Housing & Urban Development.

NOTE: All percentages have a margin of error of 2 to 4 percentage points.
