Notes: The percentages represent the number of first-time freshmen age 19 or younger from each high school who were attending Chabot or Las Positas during the Fall after the specified high school graduation year. The students from adult schools are first-time freshmen, but can be of any age. And enrollment data for adult school students were taken from the CLPCCD Institutional Research Dataset, Fall Census.

Notes

In Fall 1994, there were two changes in the Chabot-Las Positas Community College District that affected the labels and numbers used in the Student Characteristics Report.

First, the district changed from the quarter system to the semester system, so the reports starting in Fall 1994 refer to the Fall Semester while previous reports referred to the Autumn Quarter. Consequently, the trend data refer to both quarters and semesters.

Second, a new mainframe computer was installed, so the student and course data were put into a new database, and the standardized reports that used to produce the information at the Autumn Census for this report were changed or eliminated. Consequently, the most complete information is now available in the Institutional Research (IR) Dataset. This dataset is created at the end of each semester for research purposes. Since this dataset is created at a different time than the official Census, the figures do not exactly match the official total number of students. However, most percentages are the same.
