

### **Barriers to Success**

Give each student three blank cards. Ask students to write the major barrier they see to their education on one of the cards in specific terms. Ask them to form groups of three people that they do not know well and share the major barrier that they experience. As one member is speaking, the other two are to listen. When the first student is finished, the other two write one potential resource for the student who was speaking. Continue until each group member has completed.

Tabulate the results on the board.
