ABSTRACT PAGE

Chabot College is located in Southern Alameda County. A large proportion of Chabot’s incredibly diverse student body hail from seven comprehensive high schools from three local school districts that also reside in Southern Alameda County: Hayward Unified School District (HUSD), San Leandro Unified School District (SLUSD) and San Lorenzo Unified School District (SLZUSD).

Upon review of the most recent of the 2006-07 CAHSEE and CST testing results data, these Southern Alameda County school districts’ overall CAHSEE passage rates in many cases outperform state average passage rates. However, Latino and African American students in these same schools are consistently not passing the CAHSEE, particularly the maths portion, at twice sometimes three times the rates of the other students in these schools. Additionally, Latino and African American students in these same schools are the largest subgroups scoring below on the CST-STAR assessments. To look at the severity of this problem from a local perspective, it is estimated that over 1300 students from these seven South County high schools alone, will not pass one or both sections of the CAHSEE and therefore not receive a diploma this June, 2008.

To address the dismal CAHSEE passage rates of the South County current Class of 2008 seniors, Chabot seeks funding to implement the Second Wind CAHSEE Prep Project. This project is designed based on research that validates that the most proactive and effective way to ensure that students are better prepared to take and pass the CAHSEE, as well as, gain the necessary basic skills for general academic success is to offer academic preparation programs beyond the traditional school day.

The Second Wind CAHSEE Prep Project will address the objectives in the RFA as follows:

- Engage college faculty in the exploration of the development of curriculum for courses that will enable students to pass the CAHSEE.
- Partner with selected high schools, adult schools and community organizations to provide intensive 18-week CAHSEE prep workshops and classes.
- Partner with local adult schools to support their current “Credit Recovery” course offerings for approximately 200 Southern Alameda County students who have yet to complete the number of credits required to earn a high school diploma in 2008.
- Support student success by linking student participants to Chabot Community Colleges’ existing learning communities.
- Disseminate curriculum, supplemental instruction protocols, and successful program elements that might be replicated in similar communities.

By the end of year one, 500 students from three school districts and seven high schools will benefit from this program. There are two priority groups that this project will target:

1) High school students who have met all other graduation requirements except for the successful passing of one or both parts of the CAHSEE (Priority Group 1)
2) High school students who have not completed required course work for graduation and have not passed the CAHSEE (Priority Group 2)
### Objective 1: (Based on RFA Specification) (Only one objective per page, duplicate form as needed.)

Engage college faculty in the exploration of the development of curriculum for courses that will enable students to pass the CAHSEE.
