

2019-20 Committee Review Questions

1. Please review the white papers prepared by our President and Vice Presidents. At a state level, many changes to our funding model have been either enacted or are under discussion. Please comment on how these changes might impact your committee priorities over the next few years. What might your committee do differently to respond to and/or minimize the impact of these changes?
2. In last year's Committee Review, you established goals for the next three years. Summarize the progress have you made toward achieving those goals. What challenges have you faced? Identify any new goals you have established, or any goals you propose to eliminate, and explain.
