Subject: IST Program Review scores - results
Attachments: IST program review requests - final scores.xlsx

Ron,

Meant to get this over earlier, but here's the results of the program review results relevant for IST. Any questions, let me know and I can go over the process we used.

In extreme brief, the instructions to IST members were:

1. If this item is required by external regulations or accreditation, add 1000
2. If this item is essential to be able to offer a specific class or service, add 100
3. If this item improves enrollment, or creates efficiency in providing services, give a grade between 10 (for doing aforesaid improvement to a small degree) and 90 (for doing the improvement immensely)
4. If this item improves student achievement of ILOs, add between 1 and 9, with 1 for improving an ILO a small amount, through 9, for improving an ILO to a large degree.

The results in a four digit response for each request.

The results in the thousandths and hundredths place were individually added among all respondents, and the results in the tens and ones place were averaged individually.

What I am submitting is the resulting prioritization.

A process example, on scores from 3 people for a requested item:

1014
0126
0165

Would result in a final score of: 1235

It might seem confusing, but it allows for all involved to have their scores equitably represented.
