

# Chabot College Student Satisfaction Survey: Fall 2015

## Highlights

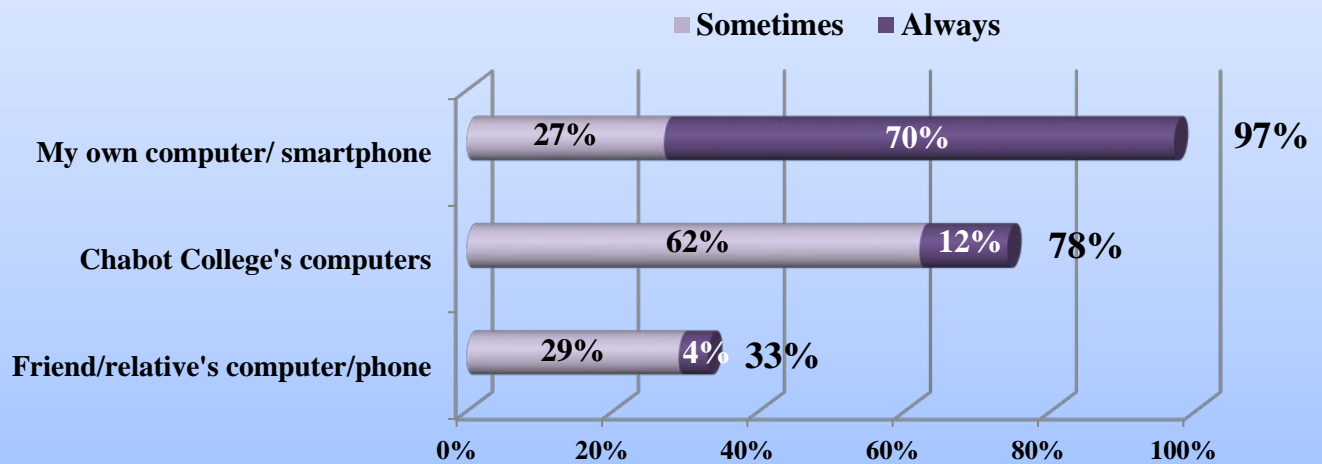

### Access to Computers

Almost all Chabot students use their own computer or smartphone to complete their Chabot assignments, according to the Fall 15 Student Satisfaction Survey. One third use a friend's or relative's computer or phone. However, about 80 percent also use college computers, so Chabot computer labs play a valuable role.

Even students who always use their own devices use the college computers at least sometimes. Half of the students who always use a friend or relative's computer also always use the college computers.

The Student Satisfaction Survey was conducted in October 2015 in a representative sample of 81 sections. Surveys were completed by 1,667 students (56% full-time; 44% part-time). The margin of error is 3 points.
