Policy: Wireless Devices

Policy

Wireless Internet access is available within the Library. Printing is not available from your own wireless laptop or other devices. Providing wireless Internet access does not ensure that your device will work on our network. Library faculty and staff can answer basic questions regarding wireless access and are not able to provide in-depth technical assistance with your computer.

Library patrons are encouraged to use the patio area or schedule a study room for teleconferencing or other online interactions that may disturb other library patrons.
