

1. I am interested in being a part of making our school and community the best it can be. I would be interested in any of the positions. I think it's important to have a sense of civic duty and I want to do my part for our community.
2. I am a biology AST major, and I picked it because I have big ideas about cleaning our ozone and our ocean with phytoplankton.
3. Three words I would use to describe myself are: Compassionate, Driven, Creative. I chose compassionate first because I think leading with kindness is where we need to start with most if not all issues. I don't think you can get anywhere without understanding other people's situation. I chose driven because I work hard and I am passionate about what I am trying to accomplish. I want to bring that drive to Student Senate to help improve our school. Chabot is amazing but maybe anywhere can be helped with the right people and the right choices. I chose creative because I think outside of the box. I am able to see things in a way many people do not, and having many different perspectives is important when making decisions for an entire school population.
4. I have really enjoyed my time at chabot and I want to make sure that everyone on campus feels the same. I think the first thing I want to do if I become a part of senate is listen to the student body and hear what they think needs improvement so I can actually get to work on the needs of the many rather than just my needs.
