

1) I am interested in the positions of student trustee, finance coordinator and legislative coordinator because they all provide unique opportunities to make a meaningful contribution to the Chabot community.

2) My major is business because I am interested in developing the skill necessary to effectively manage people, budgets and resources.

3) The three adjectives I would use to describe myself are conscientious, organized, and determined. I choose these words because I strive to be diligent and provident in my work, keep things running smoothly, and never give up on achieving my goals.

4) One goal I would like to achieve as a member of the SSCC is to promote greater engagement from students in the decision-making process. To achieve this goal, I would organize and lead a series of outreach activities such as panel discussions or workshops to provide information to students on existing opportunities to participate in decision-making, as well as strategies to become more actively involved in that process. I would also work to create new opportunities for students to have a say in the direction of the college. Additionally, I would strive to gain better access to resources and decision makers in order to help students make their voices heard.
