

- 1) I am interested in the Representative-at-Large position. As a Representative-at-Large, I would like to take advantage of my marketing skills and interest by implementing detailed communication strategies. Additionally, I have gained responsibility by taking on other leadership roles with the other programs at Chabot College. I will be committing myself to developing detailed publications for the student body, making sure information is delivered accurately and correctly, and taking on the responsibility that any other SSCC member will. I want to guarantee that each student will be able to adequately receive the information distributed at the time of need. If I am elected into the Student Senate, I will make sure to implement these requests.
- 2) I am currently a Business student and plan to transfer to a four-year institution. I would like to work within the industry of Marketing, Social Media, and Technology. I have discovered what I am truly passionate about through different clubs and programs. As AGS' Fundraising Director, I have raised over \$600+ funds for the club. As the Co-Movement AAPI Peer Guide, I have raised our Instagram follower count by 150% with the help of my co-peer guides. As the upcoming Financial Officer of the Association of China, I have planned the Lunar New Year Event for 2023 and helped resolve Financial disputes within the club. Exploring these different aspects of business: finance, marketing, leadership, management, etc. have led me to pursue it further. These newly developed skills are applicable to the Student Senate.
- 3) Three adjectives I would use are charismatic, determined and respectful. I radiate a charisma that motivates others. I used to never acknowledge my own successes. With the help of others, I have realized that I have been able to motivate others to do well too. There were many times when I felt discouraged to do well because many people believed I could not succeed in community college. I want to show them my determination. This past semester, I have met so many people of different backgrounds in programs, classes and clubs, and I truly appreciate the diversity. My respectfulness has become stronger due to everyone I have met, and I want to continue spreading respect to all.
- 4) One goal I have for being in the Student Senate is to increase the transfer resources of potential transfer students. Most of my transfer knowledge prior was from my own research and counselors. PSCN 18 helped me learn about transferring to university. However, not everyone is aware of these resources. I want to host seminars with past transfers with the Transfer Center where we can have them answer questions and share their story. By counseling others, I can raise my own knowledge and the amount of Chabot students who transfer to four-year universities. Along with this goal, I want to begin advocating for community college transfer students. I do not want community college students from being discouraged to pursue more competitive universities and careers because they are not at an accredited college.
