1. Why do you wish to run for the LPCSG position you are applying for?
I wish to run for the positions as I feel LPC has been lacking in certain events such as Hackathons which could help raise awareness regarding technology in minority communities and provide and opportunity for our students to showcase their skills and leverage them for possible employment. Furthermore, there seems to be a gap in funding for student needs such as more office hours that also needs to be addressed.

2. Please list your current or past leadership experience.
I was on the board of debate club in high school and also currently serve as ICC representative for the Honors program and the Math club.

3. What makes you stand out compared to other candidates for the position you are applying for?
I have solid ideas regarding events and student programs that could improve the competitiveness of LPC students beyond their time here. I've also acutely felt the lack of certain opportunities myself that allows me to relate with them. I'm also incredibly driven and know myself the journey from confusion and inadequacy to excelling and would like to provide others with the resources to do so.

4. What aspects of student life would you seek to improve? How would you do so?
I would mainly attempt to fix the problems I and many of those around me have faced. Inadequate knowledge among counselors regarding more advanced transfer programs such as concurrent enrollment, summer sessions, and enrollment at other community colleges. Counselors have also at times lacked the knowledge needed to provide adequate advice on general education for STEM students. I would do so by compiling lists and publishing information that I myself have had to research on the optimal way of going about community college. And as to the lack of competitive opportunities like hackathons that would help in our time beyond Las Positas I would aim to bring such events to Las Positas by working with other officers and administration.
