Catalog Update

The current Chabot College catalog covers the period 2014-2016. Chabot College will not produce a new catalog this year but, rather, this addendum which reflects all changes or corrections through Spring, 2015. It is anticipated that a fully revised college catalog will be produced in Spring 2016.

This catalog supplement should be used by students and staff along with the existing 2014-2016 catalog. Students are strongly encouraged to seek advice from the Counseling Division. Additional information and publications will be made available to students throughout the year as appropriate.

As part of its accreditation, Las Positas College focuses on Student Learning Outcomes. Student Learning Outcomes, or SLOs, are the results or evidence of student learning. They demonstrate the extent to which student performance meets expectations of learning.

These results, to be collected at the course, program and college levels, will be shared widely and used for the improvement of teaching and learning and for the improvement of the college as a whole.

These are the current Program level Student Learning Outcomes. For more information, see the Student Learning Outcomes webpage at [www.laspositascollege.edu/slo](http://www.laspositascollege.edu/slo)

Historically Black College and University (HBCU) Transfer Guarantee Project for California Community College Students

On March 17, 2015, the California Community Colleges and nine historically Black colleges and universities signed an historic agreement, which guarantees California community college students who complete certain academic requirements to transfer to a participating historically Black college and university campus.

The nine participating institutions are:
- Bennett College, Greensboro, N.C.
- Dillard University, New Orleans, La.
- Fisk University, Nashville, Tenn.
- Lincoln University of Missouri, Jefferson City, Mo.
- Philander Smith College, Little Rock, Ark.
- Stillman College, Tuscaloosa, Ala.
- Talladega College, Talladega, Ala.
- Tuskegee University, Tuskegee, Ala.
- Wiley College, Marshall, Texas

The goal of our Historically Black Colleges and Universities Transfer Guarantee Project is to educate students about additional transfer opportunities at these institutions and develop pathways that will ultimately contribute to an increase in baccalaureate degree attainment.

The California Community Colleges Board of Governors awards $1 million to UMOJA Community to better serve underrepresented students

Demonstrating its firm resolve to improve the completion rates of underrepresented California community college students, the California Community Colleges Board of Governors approved a $1 million contract to expand the services offered by the Umoja Community, a partnering nonprofit serving those students, on California community college campuses.

Umoja programs are designed to increase the retention rates as well as the graduation and transfer rates of underrepresented students, although program participation is open to all. Students enrolled in Umoja programs take classes to help them improve skills in reading, writing and critical thinking, meet with counselors at least twice a semester, receive tutoring support, attend workshops, and participate in field trips.

Contract funds will be distributed by Chaffey College to the Umoja Community to provide for state-level support and coordination for some of the following services:

- Expand the number of Umoja programs and increase the number of students served by existing programs;
- Expand existing partnerships with the University of California, California State University, Historically Black Colleges and Universities (HBCU), and Association of Independent California Colleges and Universities to increase the number of its students transferring to those institutions;
- Hire staff, including a statewide Umoja executive director and regional coordinators; and
- Expand Umoja program training and dissemination of Umoja Community practices.

The Board of Governors officially recognized the Umoja Community as a statewide success program in January 2008. The first Umoja programs were established at California community college campuses that same year. The Umoja Community administers programs at 30 California community college campuses. Three additional colleges plan to implement an Umoja program by fall 2015.

The Umoja Community program is modeled after two successful community college programs, the Daraja Project (Chabot College, Hayward, Calif.), and Project Success (El Camino College, Torrance, Calif.) Daraja students (age 21 or under) successfully completed the Basic Skills to Freshman Composition sequence at a rate 19 percent higher than other students (age 21 or under) not in Daraja. Project Success students have persistence rates at 96 percent and earn associate degrees at a rate twice that of comparable students not in Project Success.

(REVISED DEGREE)

ACCOUNTING ASSOCIATE IN SCIENCE

The A.S. degree in Accounting is the highest level of the accounting program at Chabot. The degree requires the most time and intellectual commitment. A student should obtain the degree after completing the certificate in Accounting Technician. The degree prepares students for entry-level positions within accounts receivable and accounts payable departments, payroll units, income tax firms, and financial services organizations. Graduates of the program will be able to identify, analyze, summarize, communicate, record, and interpret business transactions and financial statements. Students will learn commercial and customized accounting software and spreadsheets and will apply the skills via intensive accounting applications. Students will study professional and ethical behavioral case studies for business, as well as attain oral and written communication skills that are necessary for success. Technical courses in accounting, taxes, and payroll with commercial software will allow graduates to seek advanced placement in accounting or information systems departments. With this accounting degree, jobs are available in just about every corporate business and non-profit organization.

Career Opportunities in Business

While many accounting careers require at least a bachelor's degree in accounting, an associate's degree in accounting opens the door to some entry-level accounting careers. After you complete your associate's degree in accounting, you will be qualified to work in a number of accounting careers. These include general bookkeeping or being a clerk of accounts payable or accounts receivable. After gaining some experience in an accounting career, you will generally find more career options. However, accounting career options for a graduate of an associate's degree program are not as numerous as accounting career options for a graduate of a bachelor's or master's degree program. Salaries for those who have an associate's degree in accounting usually range from $25,000 to $35,000. With a higher degree, there is also more room for salary growth. If you want to finish your degree quickly and start working, an associate's degree in accounting can be a good way to begin an accounting career. In some cases, you can use the credits you earn for your associate's degree in accounting to transfer to a four-year school and earn a bachelor's degree in accounting, opening up more accounting career options. One advantage of pursuing an associate's degree in accounting first is to see how good a fit the field is for you. Another advantage is that you can start working in only two years, as opposed to waiting four or five years to complete a higher degree program.

**CPA EXAM PREPARATION:**

**FINANCIAL ACCOUNTING AND AUDITING**

**CERTIFICATE OF PROFICIENCY**

CPA Candidates must posses any Bachelor’s degree. Additionally, the candidates must satisfy specific educational requirements (see the CalCPA website, [http://www.dca.ca.gov/cba/applicants/tip_sheet.pdf](http://www.dca.ca.gov/cba/applicants/tip_sheet.pdf)). All of these educational requirements can be completed at a community college after the candidates completes their BA/BS degree. The classes within this certificate are counted towards the educational requirement for the CPA license. The certificate also prepares a candidate for two of the four parts of the CPA exam: Financial Accounting and Auditing. The certificate itself is neither required for the CPA exam nor guarantees the student’s eligibility for the CPA exam. However, it provides a guideline on what classes best prepare the candidate for the CPA exam. Future CPAs have amazing career prospects in three main areas: public accounting, private accounting, and government/non-profit accounting. 2015 projections for California (from the Employment Development Department, Labor Market Info website) for accountants and auditors are: 15.8% annual increase in the number of jobs, and the median salary of $78,000. The CPA license in general increases salaries for these jobs by 10-15%.

COMMUNICATION STUDIES
ASSOCIATE IN ARTS FOR TRANSFER (AA-T)

Communication Studies explores the complexity of human interaction. A degree in Communication Studies is a valuable asset for people in every industry. The National Association of Colleges and Employers, in a 2010 survey, ranked the top five desired candidate skills/qualities: (1) communication skills; (2) analytical skills; (3) teamwork skills; (4) technical skills; and (5) strong work ethic. Because Communication Studies combines theoretical understanding with practical skills development, either of our Associate in Arts degrees can serve as a strong foundation for any upper division coursework or graduate training program. From critical listening and thinking skills to intercultural communication competency; from performing business presentations to oral interpretation of literature; from understanding group dynamics to developing persuasive strategies, Communication Studies offers courses with contextual learning experiences for greater success in work, relationships, and society. Our graduates go on to careers in human resources, public relations, advertising, journalism, law, hospitality and customer service, corporate training and politics. Many continue their education at the graduate and doctoral levels. Successful completion of the transfer degree in Communication Studies guarantees the student acceptance to a local California State University to pursue a baccalaureate degree with Junior status.

ECONOMICS (ECN)

(NEW DEGREE)

AA-T ECONOMICS
ASSOCIATE IN ARTS FOR TRANSFER

An Economics education provides the student with a logical way of approaching various and sundry problems all of which provides qualitative and quantitative skills valued highly by employers. The student learns techniques for analyzing contemporary economic problems and develops the ability to exercise sound judgment in evaluating public policy issues. Many of these skills are useful in daily decision-making irrespective of career choice. The broad background developed as result of pursuing the Economics major encourages the student to become an interested, understanding observer of the events of today’s and tomorrow’s world.

Career Opportunities in Economics

The Economics major prepares the student for a broad variety of careers including those in law, journalism, banking and insurance, government, teaching, and research. In addition, the study of economics has become essential in today’s dynamic and complex business environment. As of 2008, 28% of economics graduates ended up in business, finance, or associated professions. A 2013 University of Michigan study showed that Economics professors were the second highest paid from among 27 other disciplines with a median salary of $92,070 per year that included both masters degrees and PhDs. The number of jobs over the next decade is expected to increase by about 14% from 2012 to 2022. Typical responsibilities of an economist are to: research and analyze economics issues; conduct surveys and collect data; analyze data using mathematical models and statistical techniques; prepare reports, tables, and charts that present research results; interpret and forecast market trends; advise business, governments, and individuals on economic problems; write articles for publications in academic journals and other media sources.

11 Engineering Design and Analysis 2 units
An introduction to the engineering design process from a practical and professional perspective. Student teams work on a term-long engineering project that entails the creation of a design for a useful object with moving parts that requires the application of some external power source. Conceptual and Critical/Final design reviews require teams to describe and justify the effectiveness, and likely customer-acceptance, of the design. The student designers: select materials, components, sources of supply; produce detailed parts-lists; create using CAD-tools detailed and dimensioned production and assembly drawings; create formal electrical and fluid-control component interconnection schematics; provide a detailed estimate for the production-cost. When needed students use engineering software tools (such as MATLAB) to assess and predict the kinematical, structural, thermal, electrical, fluid-flow, wear/corrosion, optical, and magnetic performance of the proposed design. Students are encouraged to build from the design plans a form-and-fit mock-up, or if possible a fully functioning prototype. 1 hours lecture, 3 hours laboratory. Transfer: CSU; UC
