Documentation Specialist (Medical Scribe)
Location: San Francisco
Pay: Starting @ $12/hr
Schedule: part time and full time employment opportunities available. Approximately 20 - 40 hrs/wk

Company Overview:
Ian and Pelu, the Augmedix co-founders, first teamed up at Stanford to develop medical devices as part of the Biodesign program. Over the course of the program, the two realized that no matter what the specialty, physicians were drowning in a flood of data and documentation. Their focus quickly turned to digital health.

After trying an early version of Google Glass in the summer of 2012, the two realized the platform’s potential in healthcare and dropped everything to create the world’s first Google Glass startup. That company, Augmedix, was founded with one core belief: technology can free physicians and allow them to focus on what they do best - taking care of patients.

Job Overview:
Responsibilities:
We are seeking full-time documentation specialists with a strong interest in medicine to work one on one with a variety of medical professionals and document the patient visit in the EHR. As part of this team, you will have the ability to gain experience in different medical specialties while collaborating with a team of young, talented professionals working to revolutionize healthcare.

- Part time and Full time opportunities available
- Assist physicians in documenting the patient's medical record (EMR)
- Navigate the EMR during assistance of patient care
- Assist physicians in a variety of specialties including primary care, orthopedics, rheumatology, etc.

Requirements:
- Must have a college degree (A.A. degree) or be working towards completing a college degree
- Prior clinical experience required such as volunteering, shadowing, clinical research, scribing, paramedic training, or being a medical assistant.
- Excellent spelling and typing skills
- Quick to pick up new technology
- Knowledge of medical terminology highly preferred
- Familiarity with navigating the electronic medical record (EMR) highly preferred
- Self-sufficient and quick-to-learn
