Web Developer Intern

Gatelets is looking for a stud or studette to bring their Web skills to our organization. This is (initially) a contract position with lots of flexibility and jam-packaged opportunity to learn amazing Web skills that can be applied to products for medium to enterprise-sized customers.

We are looking for someone who has a strong design sense, HTML (4/5), CSS, JavaScript, Bootstrap 3 AND JSP (Java Server Pages) skills.

If you are versed in Java and Java-based technologies and MYSQL, that will make us so happy.

This position can be remote, however if you are in San Francisco or the Bay Area that will be a major plus. Regardless of location, qualified applicants must be self-motivated and reliable; a good sense of humor. Hours are flexible so long as the jobs get done.

All negotiable.

Send us examples of your work and resume at jobs@gatelets.com
