

Chabot College

Course success and withdrawal rates, by courses and students

Fall 2000 to Fall 2016

All Students

Between Fall 2011 and 2013, Chabot students had higher success rates and lower withdrawal rates than anytime in the last 16 years. Success rates, traditionally stable at 65-67 percent, rose to 69 percent in Fall 2013. By Fall 2016, they remained almost as high at 68 percent. Withdrawal rates, stable at 22-23 percent, dropped to 16-17 percent in the last eight years. Non-success rates (D, F, No Credit, No Pass, or Incomplete) have gone up slightly from an average of 12 percent during the early 2000's to 16 percent in Fall 2016. However, the percentage of students who withdrew from all their courses fell from 18 percent in the early 2000's to 10-11 percent in recent years. Compared to the early 2000s, students are now more likely to stay enrolled in their classes, whether they are succeeding or not.
