

Chabot College Strategic Plan Goal

Summary of Progress after Three Years of Initiatives

Our Strategic Plan goal since 2012 has been:

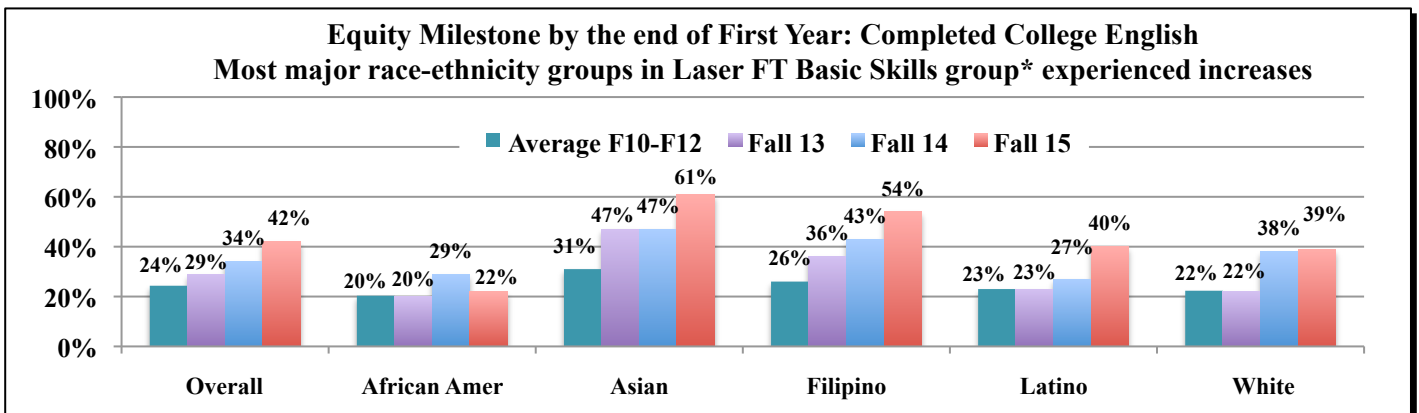

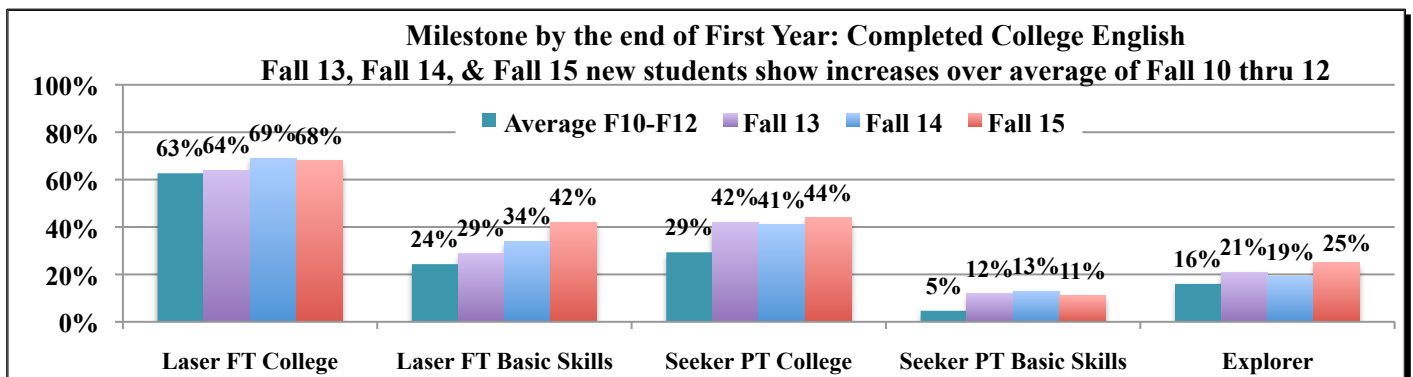

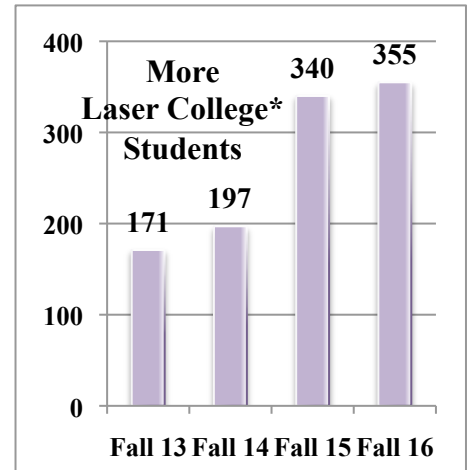

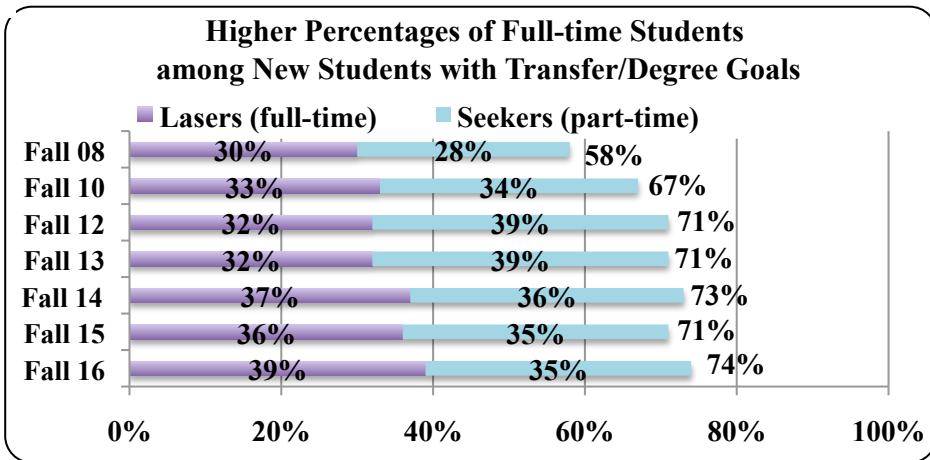

"Increase the number of students that achieve their educational goal within a reasonable time."

Have we made any progress? YES! Increases in percentages now = increases in numbers later.

New students in Fall 2014, 2015, & 2016 with transfer or degree goals were more likely than past cohorts to:

- Attend full-time
- Attend as "Laser Full-time College" students, our most successful educational goal group*
- Complete College English by the end of their first year
- Take a Math course in their first year
- Complete College Math by the end of their first year

The college initiatives that encourage more students to attend full-time and complete milestones are paying off! As more students complete these milestones than previous cohorts, more are likely to achieve their educational goals.
