

Chabot College Strategic Plan Goal

Summary of Progress on Completions after Four Years of Initiatives

Our Strategic Plan goal since 2012 has been:

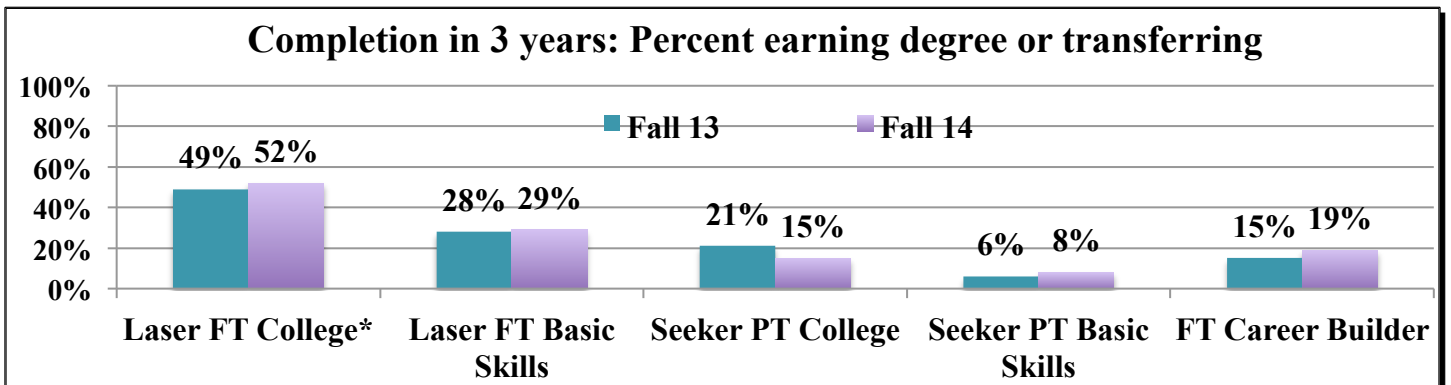

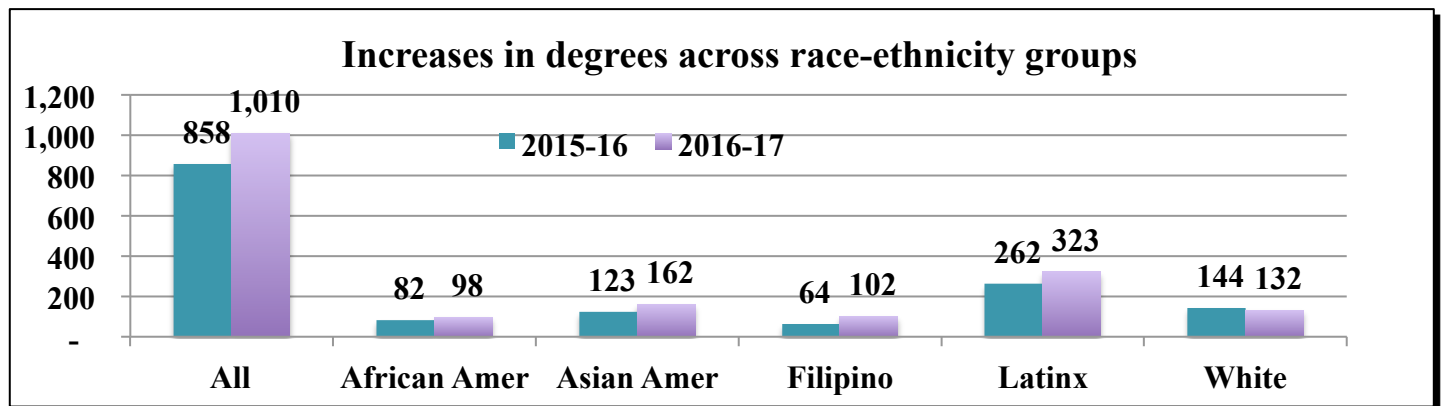

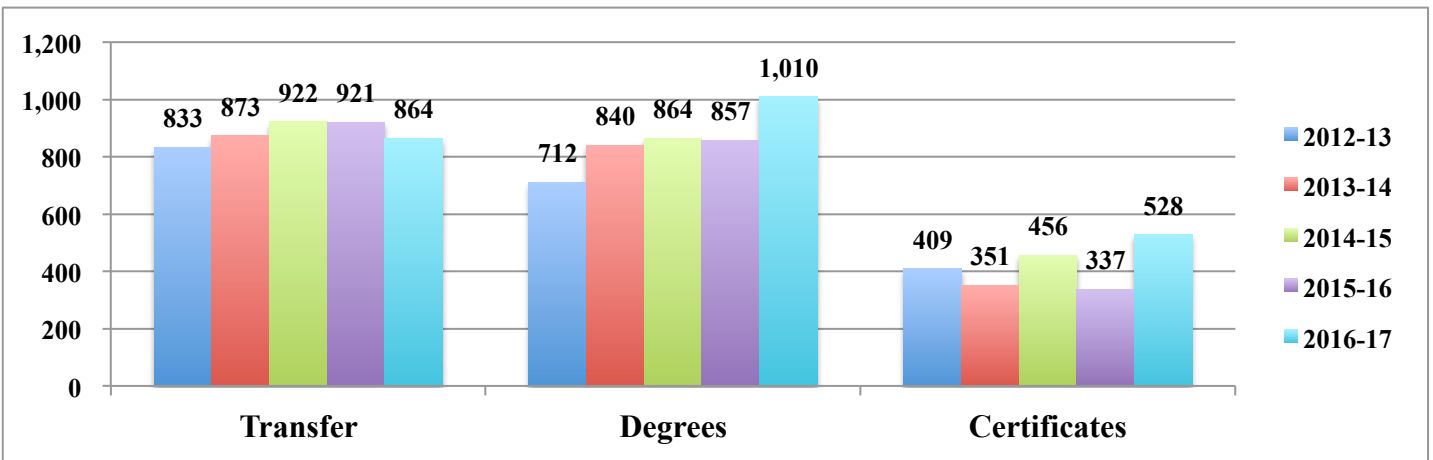

*"Increase the number of students that achieve their educational goal within a reasonable time."
In 2016, we added, "and ensure equitable outcomes among student groups."*

Have we made any progress? YES!

Compared to 5 years ago: The numbers of transfers, degrees, and certificates are up!
The recent degree increase was shared by most race-ethnicity groups.
However, can we sustain these increases? Degree increases were driven by new AA-T Degrees.

And we have a long way to go.....

The percentage of students who earn a degree or transfer within 3 years is very low for most groups.
Students who are Lasers (FT with transfer/degree goals) and start in College English are most likely to complete.
If we place more students into College English, will more complete within 3 years?

* For definitions of the ed goal groups and progress details, see: www.chabotcollege.edu/ir/stplanprogress.asp#Measure_Progress
