Persistence rates of new students by Student Services

Fall 2001 to Spring 2002 through Fall 2013 to Spring 2014

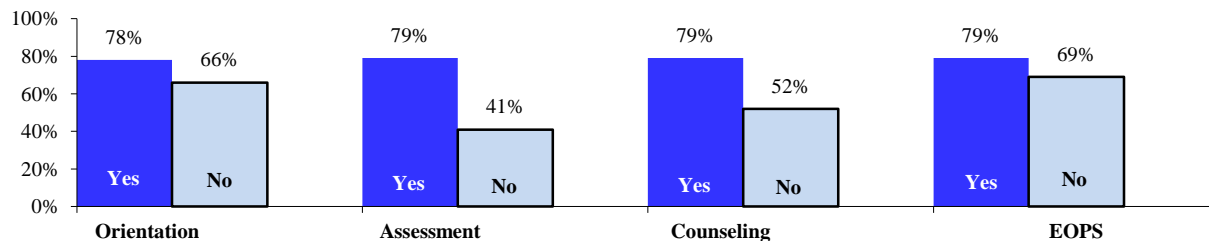

Persistence rates measure the proportion of students in one term who continue to enroll in college from one term to the next. Term to term persistence rates are defined as the percentage of students enrolled as of Census Day in the first term who are subsequently enrolled as of Census Day in the Following term.

On average, about two thirds of new Chabot students enrolled in the Fall persist to the Spring semester. However, the persistence rates of new students who receive the Matriculation services of orientation, assessment, counseling, or participated in Extended Opportunity Programs and Services (EOPS) have higher persistence rates than new students without those services.
