

Chabot College Summer Enrollments & Success Rates

The general upward trend in summer enrollments (with a slight dip in 2017) was sustained in Summer 2019. Like Summers 15-18, Summer 19 offered two 5-week sessions, as well as 6-, 8-, 9- and 10-week sessions, with the largest enrollments in the 8-week session. In Summer 19, over half of the students enrolled in online or hybrid sections; the rest took face-to-face sections.

Overall success rates decreased slightly to 77% in Summer 19, from 79% in Summer 18, largely due to drops in success in the early 5- and 6-week session. The greatest decrease in success rates by course meeting location occurred in hybrid classes (from 78% in Summer 18 to 66% in Summer 19).
