

My name is Stacy Harris I'm a continuing student here at Chabot college. I would like to apply for the Student Senate position of VP of Administration. I believe this position will give me more leadership skills that will help me in the future with running my own business. I know this position will require more of my time than my previous positions and I'm ready to pursue this new challenge in my life. I wouldn't be here now if somebody didn't see in me what I didn't see in myself, now I know to set my goals higher. I would also like to apply for Finance Coordinator. I feel that both of these positions will benefit me in the future with my Business Degree, with doing the budget for the Student Senate it teaches you about budgeting, how to make a budget work when you have different clubs and programs needing funding.

My major is Business Administration, I picked this major because one day I would like to own my own business that I can one day leave to my children and grandchildren. I came back to school to make a better future for my family.

Three adjectives I would use to describe me would be helpful. I love to meet new people I'm always talking to and encouraging new students that need help. I'm always offering my services or trying to get them the services they need. My next adjective would be hardworking. I will get the job done if that means staying late, putting in extra hours I will do what I have to do to get the job done. If I see a fellow Senator or student that could use an extra hand on a project I'm here to get the job done. My third adjectives would be reliable. If you ask me to do a project you will not be disappointed I always keep my word and do what's asked of me. I'm the person to call when you need help and trying to figure something out.

The one goal I would like to achieve would be to get more online support for disable students I have experience first hand with myself and my son not having the same are almost the same support that we had when classes was in person. The school district was not prepared for

this! What would I do? I would start advocating for more support with online classes, go to meetings at the school district so my voice could be heard for me and other students, let them know that this is a big problem, also start a group or committee of people who also feels the same way. I would try my best to get us students more support!
